Legal obligations, permits and management of the relationship with environmental authorities

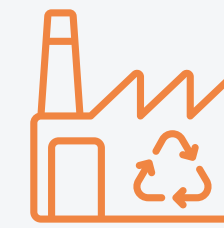

Reporting to Authorities

Mandatory periodic reports (annual, semi-annual, monthly), environmental statements and relationship management with DJM and AFM.

Regulatory Acts

Obtaining and renewing environmental permits, environmental approvals and agreements necessary for the legal operation of the activity.

Waste Management

Management plans, contracts with authorized operators, reports and records in accordance with national legislation in force.

Environmental Assessments & Studies

Impact studies, level I and II assessments, evaluations and Natura 2000 appropriate assessment studies.

Legislative compliance audit

Complete analysis of environmental legal compliance, with risk identification and concrete solutions to avoid sanctions and optimize internal processes.

Environmental Due Diligence

Environmental risk assessment, bank financing, real estate acquisition or stock market pre-listing.

I. Sustainability

Sustainability Reporting

CSRD

We provide support in collecting and structuring data, developing the report according to standards, and preparing for the audit.

Sustainability Strategy

Strategy

Based on Dual Materiality Analysis, we build realistic plans aligned with the organization's profile and priorities.

Double Materiality Analysis

ESRS

We analyze relevant impacts, risks and opportunities. Clear basis for reporting and strategic decision (CSRD/ESRS).

Taxonomy EU

Taxonomie

We assess the eligibility of economic activities and the degree of alignment. Support in documenting technical criteria.

II. Carbon Footprint

Carbon Scope Footprint 1, 2, 3

GHG

GHG Protocol calculation and reporting. Documented, coherent process, with clear data traceability.

CO₂ Reduction Strategy & SBTi

SBTi

We identify the main sources of emissions, propose concrete measures and align targets with the SBTi methodology.

LCA / EPD

LCA

We assess environmental impacts at the product or process level and prepare documentation for Environmental Product Declarations.

CBAM & Taxonomy EU

CBAM

Calculation of emissions associated with goods imported into the EU and assessment of the alignment of activities with the EU Taxonomy.

III. ESG Ratings & Certifications

EcoVadis

Initial assessment, evidence collection, questionnaire completion, improvement plan and score optimization.

CDP

Assessment of readiness, definition of the dataset, assistance in completing CDP Climate/Water/Forest responses.

B Corp

Eligibility assessment, completion of B Impact Assessment, action plan to reach the threshold and preparation of evidence.

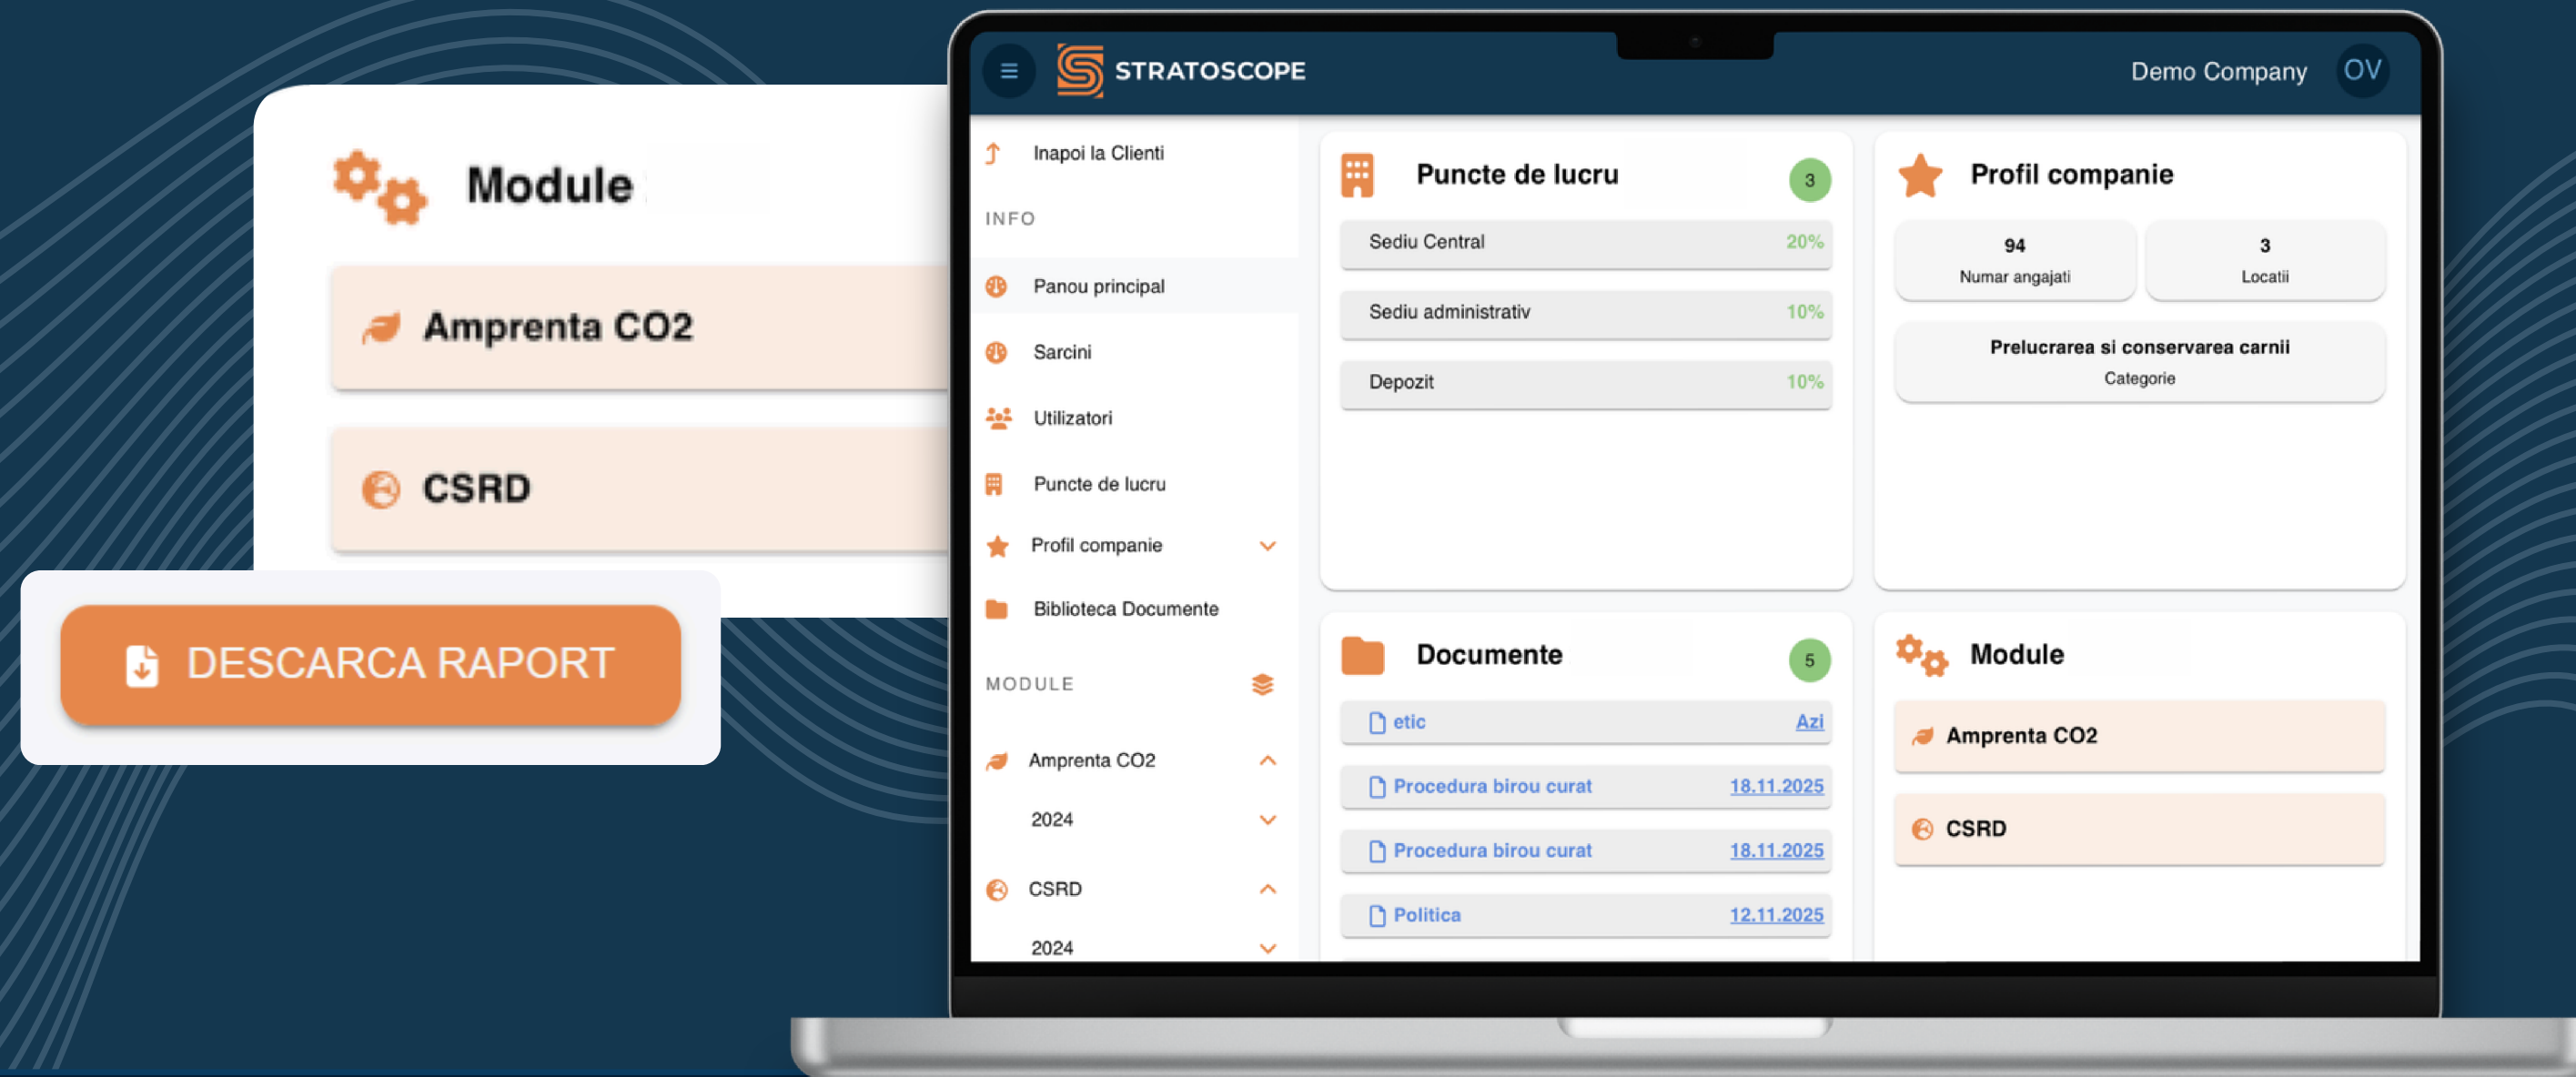

Modular SaaS platform for CO₂ calculation and CSRD/ESRS reporting

Module Carbon Footprint Calculation

- Scope 1, 2 & 3 conform GHG Protocol
- Automatic allocation of emission factors (DEFRA, EXIOBASE)
- Calculation of degree of uncertainty
- Decarbonization scenarios & simulations
- Evolution over time – comparison with the reference year
- Export audit-ready (Word, Excel)

Module CSRD / ESRS Reporting

- Structured data collection ESRS E1, S1, G1
- Multi-team ESG indicator management
- Group-level consolidation / multiple locations
- Full traceability of sources and versions
- Approval flow & roles/responsibilities
- Export report according to CSRD, ready for audit

Benefits per stakeholder

Sustainability Team

Centralized collection, progress on KPIs, reduced time for follow-up and annual reporting.

Financial / Audit

Solid basis for verification, clear sources, preserved versions, facilitated internal and external audit.

Management

Visibility on emissions and ESG indicators, support for strategic decisions and investors.
