✓ Company Profile And Competencies

What Does IHOPE REAL Do?

At IHOPE REAL, a team with over 20 years of experience makes industrial automation, turnkey factories and smart warehouses. At the same time, our company provides machines, equipment and consumables for primary, secondary and transport packaging. IHOPE REAL also optimizes its customers' current intra-logistics and logistics processes. Last but not least, the team executes the maintenance, service and technical assistance contracts for the delivered equipment.

Our Story

The founder of IHOPE REAL has a rich experience, working in the field of sales and consulting for packaging processes and equipment, for various companies in Western and Northern Europe.

Automation of packaging processes through IHOPE REAL

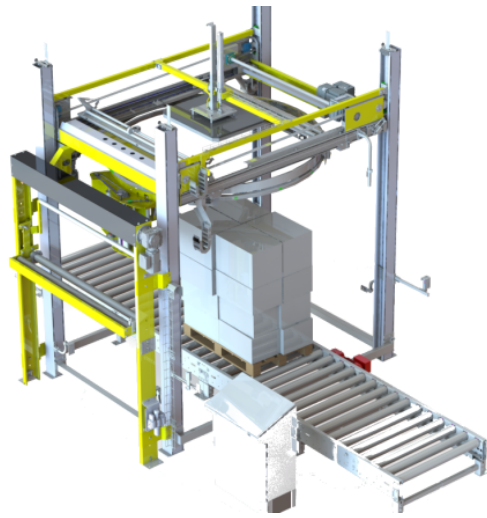

The entire team was and is formed around the idea that automation is the way for a better life in the industry, for Romanian products and services to fight as equals on increasingly competitive markets.

We Sell Guaranteed Solutions

We put our client's need to overcome problems before anything else. We

listen, think and implement solutions that we guarantee, together with our partners, the equipment suppliers.

Innovation, honesty and efficiency, combined with the high-quality technology of our products, have led us to the optimal result every time and contributed to the success of our customers and partners.

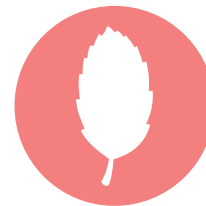

✓ **Company products**

The complete range of packaging and recycling products and supplies

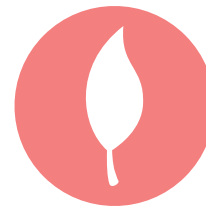

Stapling machines, wrapping machines, packaging machines, binding machines, marking and labeling equipment

Semi-automatic presses for recycling, automatic lines for baling

Automatic lines for palletizing, packing, wrapping, tying, marking and labeling

Consumables for stapling, packaging films, shrink films, stretch films, stretch-hood films, tubular films, binding strap

Machinery and equipment

Each customer and each workflow has some specificity in the problems they encounter. IHOPE REAL has viable automation solutions that not only solve problems but are equally effective (low power consumption, low cost of consumables, low installation time and perfectly interacts with other equipment).

Automatic packaging lines and automations

We can ensure a very high level of complexity from the point of view of automated processes, going up to projects such as turnkey factories or smart warehouses.

The **range of machines and equipment** we cover: packaging equipment, binding equipment, stapling equipment, marking and labeling equipment, wrapping machines, recycling presses. For all machines, we provide the necessary consumables as well as maintenance and technical assistance services.

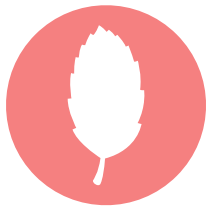

✓ Company Services
